# uniWave™ SCALARVIA

## SWEETEN YOUR LIFE NATURALLY

### The Truth of Sugar

Consuming too much sugar can lead to health problems such as weight gain, diabetes, and heart disease, as it's quickly absorbed and can cause blood sugar levels to spike. However, there's hope for maintaining good health by being mindful of our sugar intake, reading food labels, and choosing natural sweeteners like fruits and spices. By making these simple changes, we can enjoy the sweetness in life without compromising our well-being.

### Why Stevia is more better?

Stevia Rebaudiana is now being adopted as a natural sweetener around the world. It was used for centuries by the Guaraní tribes of Brazil and Paraguay.

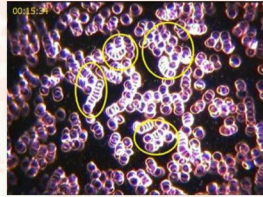

- It's 200 - 300 times sweeter than a normal sugar.
- Sugar-free (contains no sugar).
- Free of Calories.
- Suitable to use as a sweetener for food and beverages.

## THE BLOOD CIRCULATION

### BEFORE

Before using  
 Uniwave Scalarvia  
 by Quantes Technology

### AFTER

30 minutes after using  
 Uniwave Scalarvia  
 by Quantes Technology

### What is the Uniwave Scalarvia by Quantes Technology?

1. Contains Stevia Extract
2. Uniwave by Quantes Technology
3. Contains Growth Factor Concentrate (GFC)
4. Contains 200 drops
5. Contains "NO SUGAR"
6. Free of calories

### What is Growth Factor Concentrate (GFC)?

GFC is a patented technology that is a high protein isolate extracted from colostrum and contains high levels of insulin-like growth factor (IGF) and Epidermal Growth Factor (EGF).

GFC can stimulate the formation of new stem cells, which will then group to form new epidermis and dermis to replace the old and dying cells in the human body.

Growth factors have long been known as an effective treatment for various diseases. We developed growth factor concentrate (GFC) from platelets and evaluated their clinical outcome in nasolabial folds.

### Benefits of Uniwave Scalarvia:

1. Stabilizes blood sugar levels
2. Dandruff and hair health
3. Improves mood and insomnia
4. Strengthens immune system
5. Promotes weight loss
6. Promotes insulin production by stimulating the pancreas health
7. Balances your hormone level
8. Stabilizes the blood pressure

### Uniwave by Quantes Technology Key Benefits:

It has 100,000 different kinds of decoding technologies. Boosting the immune system, enhance the metabolism, and recharge the body cells

1. Provide Optimum Energy for Healthy Lifestyle
2. Supports Rejuvenation of Cells and Repair the Damaged Cells
3. Trigger the Production of Stem Cells for New Cell Formation
